Private-network proof: names, ports, then :pong

DNS inside the containers

```
root@client:/app# getent hosts server
172.18.0.3 server

root@server:/app# getent hosts client
172.18.0.2 client
```

Client node

```
iex --sname cthulu --cookie howard \
  --erl "-kernel inet_dist_listen_min 9100 \
  inet_dist_listen_max 9100"
```

Server node

```
iex --sname lovecraft --cookie howard \
  --erl "-kernel inet_dist_listen_min 9101 \
  inet_dist_listen_max 9101"
```

Then, from server

```
Node.ping(:"cthulu@client")
# => :pong
```
